Organización Norteamericana de Protección a las Plantas

Executive Committee Decision Sheet

D No.: 3

Subject: NAPPO Irradiation Standard

Background:

In 1997, the NAPPO Executive Committee approved the NAPPO standard "*Guidelines for the Use of Irradiation as a Phytosanitary Treatment*". This NAPPO regional standard served as the basis for development of an international standard approved by the Fifth Interim Commission on Phytosanitary Measures in April, 2003.

Recommendation:

Remove the NAPPO standard "*Guidelines for the Use of Irradiation as a Phytosanitary Treatment*" from the active records of NAPPO. Maintain a copy on file for historical record.
