Highlights and Accomplishments

Standard Specification	2014
Drafting started	June 2016
EWG Meeting in Montreal, CAN	Oct 2016
EWG Meeting in Riverdale, MD, USA	Jan 2017
Country Consultation	March 2017
Final Draft September	September 2017

Systems Approach Expert Working Group in Riverdale, MD January 2017 – Chair Dr. Eric Allen

RSPM 41

Use of Systems Approaches in Managing Pest Risks Associated with the Movement of Forest Products

- Provides specific guidance on the combination of measures available to reduce the risk of pest infestation to support phytosanitary trade of wood commodities (round wood, sawn wood and wood chips)
- Describes measures which may be applied pre-harvest and during: harvest, transportation, production, export and post-shipping which may be integrated to address pest risks
- Describes the level of oversight and the specific duties of the NPPOs of the exporting and importing countries and other stakeholders
- Addresses diversity of commodities, number of entities involved from planting to harvest and the complexity of the production stream

RSPM 41 Explanatory Document

- Provides supporting information for RSPM 41
- Explains the measures and activities described in the standard
- Provides science and literature for reference and forest product systems approach design guidance
- Illustrates verification and certification procedures for pest risk reduction measures with international examples

Explanatory Document for RSPM 41

Use of Systems Approaches in Managing Pest Risks Associated with the Movement of Forest Products

Contents

Introduction and scope	2
1. General Requirements/ Basis for Regulating	2
2. Specific Requirements	3
2.1 Pre-Harvest	4
2.2 Harvest	6
2.3 Post-Harvest	8
2.4 Forest Commodity Processing	10
2.4.1 Forest Commodities	10
2.4.2 Quarantine Pest Guilds	11
2.4.3 Wood chips	21
2.5 Storage	24
2.6 Transportation	27
2.7 Post-Shipping	28
3. Example Systems Approach – Ash Sawn Wood	29
References	21
Definitions	29
